

## Our E-Learning

### Airhead and Teams

We understand that many of you have had difficulties logging on to your air head as broadband providers are struggling with the increased demand. Most learning opportunities are provided for via Teams, so if you're struggling, try to access Teams, which can be found in the widget in the top left hand corner of your outlook page. The children then need to log in using their log in details provided previously.

## The Amazon

## Why is it important to have rain forests?

### Writing

During our e-learning writing we are looking for the children to apply previous taught learning alongside using connectives, adjectives and sentence punctuation as we write non-chronological reports (information texts), biographies about Greta Thunberg and a persuasive email to save the Amazon from deforestation.

### Maths

After a successful start to the Maths e-learning lessons we are going to continue exploring other areas of the Maths curriculum. This will include looking at: place value, telling the time, position and direction, and word problems. On top of this, we will continually re-visit areas we have previously covered and look to stretch our learning and understanding further!

### Homework

**Reading-** Our year 2 target is to read at least 3 times a week at home.

**Challenge-** Can you create a pop-up model of The Amazon. You might also write a story linked to your artwork.

**Thank you** – We would just like to say thank you for all of the support that you have given us by engaging with the e-learning on offer.

### Topic

During our topic we are going to be exploring, in some detail, information and facts about the amazon including where it can be found. We will also be using forms to recap some of our previous learning and topics, so that we are retaining understanding.
